

ROUGH TERRAIN CRANE

[SPECIFICATION]

■CRANE										
Description		Rough terrain crane with maximum lifting capacity 51 ton								
●Crane spe	ecification									
		10.7 m Boom 51,000kg × 2.5 m (Parts of line : 11)								
		18.8 m Boom 22,000kg × 7.0 m (Parts of line : 6)								
Maximum rated	d lifting	26.9 m Boom 19,000kg × 5.0 m (Parts of line : 4)								
capacity	u	35.0 m Boom 12,000kg × 8.0 m (Parts of line : 4)								
		8.8 m Jib 5,000kg × 75° (Parts of line : 1) 15.2 m Jib 3.000kg × 78° (Parts of line : 1)								
		15.2 m Jib 3,000kg × 78° (Parts of line : 1) Rooster 5,000kg								
Boom length		10.7m — 35.0m (4-section)								
Jib length		8.8m, 15.2m (2-section, offset angles 5°, 25° and 45°)								
Maximum rated	l lifting	8.6m, 15.2m (2-section, offset angles 5 , 25 and 45) 35.6m (Boom)								
height	ı iii iii ig	51.0m (Jib)								
Hoisting	Main winch	110 m/min (at 4th layer)								
line speed (winch up)	Auxiliary winch	96 m/min (at 2nd layer)								
Hoisting hook speed	Main winch	(Parts of line; 7): 15.7 m/min. (at 4th layer)								
(winch up)	Auxiliary winch	(Parts of line; 1): 96 m/min. (at 2nd layer)								
High-speed lowering	Main winch	144m / min (at 4th layer)								
Rope speed	Auxiliary winch	125m / min (at 2nd layer)								
Boom derricking	g angle	-1.0° — 82.0°								
Boom derrickin	g time	49s / -1.0° — 82.0°								
Boom extendin	g speed	10.7m — 35.0m / 80s								
Slewing speed		2.3min ⁻¹								
Tail slewing rad	lius	4,100mm								
Equipmen	t and stru	ucture								
Boom type		Round-shaped, 4-section hydraulically telescopic type								
		(the 2nd, 3rd and 4th boom sections at the same time)								
Jib type		2-section (2nd section of draw-out type)								
Boom extension	n/	(offset angles 5°, 25° and 45°)								
retraction equip		One hydraulic cylinder and wire ropes used together								
Boom derrickin	g/lowering	One hydraulic cylinder of direct acting type with pressure-								
equipment		compensated flow control valve								
Winch system Main & Auxilian	y winches	Driven by axial plunger type, hoisting motor through planetary gear reduction, Controlled independently by respective operating lever Equipped with automatic brake								
Clauring agrican		Equipped with Hydraulic motor drive and a planetary gear speed								
Slewing equipm	nent	reducer (built-in negative brake), Free / Lock change-over type								
Slewing bearing	g	Ball bearing type								
	Type	Hydraulic H-beam type (with float and vertical cylinder in single un								
		7,000mm (Fully extended)								
Outriggers	Extension	6,500mm (Intermediately extended)								
Outriggers	Extension width	6,500mm (Intermediately extended) 5,000mm (Intermediately extended)								
Outriggers	width	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted)								
Wire rope for	width Main winch	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m								
Wire rope for hoisting	width Main winch Auxiliary winch	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m								
Wire rope for	width Main winch Auxiliary winch	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m								
Wire rope for hoisting Hydraulic	Main winch Auxiliary winch equipme	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m								
Wire rope for hoisting Hydraulic Oil pump	Main winch Auxiliary winch equipme	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt								
Wire rope for hoisting Hydraulic Oil pump Hydraulic	width Main winch Auxiliary winch equipmel Hoisting motor	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type								
Wire rope for hoisting Hydraulic Oil pump Hydraulic	Main winch Auxiliary winch equipme	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor	width Main winch Auxiliary winch equipmel Hoisting motor Slewing	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve	width Main winch Auxiliary winch equipmel Hoisting motor Slewing	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder	Main winch Auxiliary winch equipme Hoisting motor Slewing motor	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Double acting with integral check and relief valves								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type 560L								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type 560L ACS (Automatic Crane System with voice alarm), Slewing automatic stop system,								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type 560L ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valve								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type 560L ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valve, Overhoist prevention device, Winch holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves,								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m It 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valv Overhoist prevention device, Winch holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves, Outrigger lock pins, Slewing lock,								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type 560L ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves, Outrigger lock pins, Slewing lock, Joystick control safety stop system,								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m It 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves, Outrigger status detector, Boom derricking / telescoping holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves, Outrigger lock pins, Slewing lock,								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca	width Main winch Auxiliary winch equipme Hoisting motor Slewing motor spacity vices	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type 560L ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves, Outrigger lock pins, Slewing lock, Joystick control safety stop system, Hydraulic oil temperature warning device, Hydraulic oil return filter warning device,								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca Safety de	width Main winch Auxiliary winch equipme Hoisting motor Slewing motor spacity vices	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type 560L ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves, Outrigger lock pins, Slewing lock, Joystick control safety stop system, Hydraulic oil temperature warning device, Hydraulic oil return filter warning device, ACS outside indicator nt Working light (on boom, table and cab),								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca Safety de	width Main winch Auxiliary winch equipme Hoisting motor Slewing motor spacity vices	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type 560L ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves, Outrigger lock pins, Slewing lock, Joystick control safety stop system, Hydraulic oil temperature warning device, Hydraulic oil return filter warning device, Morking light (on boom, table and cab), Winch drum turning indication device, Winch over unwinding device								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca Safety de	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor spacity vices equipmel	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type 560L ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves, Outrigger lock pins, Slewing lock, Joystick control safety stop system, Hydraulic oil temperature warning device, Hydraulic oil return filter warning device, ACS outside indicator nt Working light (on boom, table and cab),								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca Safety de	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor spacity vices equipmel	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type 560L ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves, Outrigger lock pins, Slewing lock, Joystick control safety stop system, Hydraulic oil temperature warning device, Hydraulic oil return filter warning device, Hydraulic oil return filter warning device, Working light (on boom, table and cab), Winch drum turning indication device, Winch over unwinding device Level gauge, Accessory socket (24V), 34 ton hook, 5 ton hook								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca Safety de	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor spacity vices equipmel	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m It 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting with integral check and relief valves Double acting type ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves, Outrigger lock pins, Slewing lock, Joystick control safety stop system, Hydraulic oil temperature warning device, Hydraulic oil return filter warning device, ACS outside indicator It Working light (on boom, table and cab), Winch drum turning indication device, Winch over unwinding devic Level gauge, Accessory socket (24V), 34 ton hook, 5 ton hook All steel welded construction, 1 person, Rubber mounted,								
Wire rope for hoisting Hydraulic Oil pump Hydraulic motor Control valve Cylinder Oil reservoir ca Safety de	width Main winch Auxiliary winch equipmel Hoisting motor Slewing motor spacity vices equipmel	6,500mm (Intermediately extended) 5,000mm (Intermediately extended) 2,480mm (Completely retracted) Diameter: 18mm×Length: 195m Diameter: 18mm×Length: 110m nt 4 pumps, plunger and gear type Axial plunger type Axial plunger type Double acting with integral check and relief valves Double acting type 560L ACS (Automatic Crane System with voice alarm), Slewing automatic stop system, Outrigger status detector, Boom derricking / telescoping holding valve, Automatic winch brake, Winch holding valve, Automatic winch brake, Winch drum roller, Hydraulic safety valves, Outrigger lock pins, Slewing lock, Joystick control safety stop system, Hydraulic oil return filter warning device, Hydraulic oil return filter warning device, Hydraulic oil return filter warning device, Winch over unwinding devic Level gauge, Accessory socket (24V), 34 ton hook, 5 ton hook All steel welded construction, 1 person, Rubber mounted, Adjustable steering wheel, Adjustable seat, Seat belt, Cab cooler,

■Notes for the lifting capacity chart

When the outriggers are used

- The lifting capacity charts are based on the jib stowed on the boom side.
- 2. The lifting capacity chart indicates the maximum load which can be lifted by this crane provided it is level and standing on firm level ground. The values in the chart include the mass of the main hook and slings for boom operation, and auxiliary hook and slings for jib operation.

[51 ton hook (mass: 400kg), 34 ton hook (mass: 300kg), 5 ton hook (mass: 120kg)]

Within the chart the figures in the area bordered with a thick line are based on structural limitations while other figures are determined by stability limitations.

- The working radii are the actual values allowing for boom and jib deflection. Therefore you must always operate the crane on the basis of the working radius.
- 4. The jib working radius is based on the jib mounted on the end of the 35.0m boom. When operating at other boom lengths, use the boom angle alone as the criterion.
- Do not operate the jib when the outriggers are completely retracted.
- 6. The lifting capacities for the over sides vary with the outriggers extension width. Therefore for each outriggers extension condition you should work according the lifting capacity chart. Use the lifting capacity chart of outriggers full extension for both front and rear areas lifting capacities.

Outrigger extension status	Intermediate extension (6.5m)	Intermediate extension (5.0m)	Complete retraction
Area α°	35	30	3

The lifting capacity of the rooster sheave is the lifting capacity of the boom minus the mass of all attached hook, slings etc. to the boom, with an upper limit of 5,000kg.

[The hook for use with the rooster sheave is the 5 ton hook (mass: 120kg) with one part of line.]

- 8. If the boom length, boom angle and/or working radius exceeds the rated value, use the lifting capacity for the rated value or for the next one, whichever gives the smaller lifting capacity.
- 9. If you are working with the boom while the jib is rigged, subtract 3.0 ton plus the mass of all attached hook, slings etc. to the boom from the each lifting capacity of the boom, with an upper limit of 18 ton.

Do not use the rooster sheave in this situation. And do not operate the boom while the jib is rigged, when the outriggers are completely retracted.

- 10. In whatever working conditions the corresponding boom critical angle is shown in the chart. The crane can tip over if the boom is lowered below the critical angle even if unloaded. Therefore, never lower the boom below these angles.
- 11. If you work with 11 parts of line on the hook (with * marked in the lifting capacity chart), use the rooster sheave.
- 12. The standard parts of line for each boom length are as indicated in the chart. If you work with a non-standard number of parts of line, do not exceed 45.1 kN (4.6 tf) per wire rope respectively.
- High-speed winch operation should only be performed to allow descent of the hook alone. Avoid sudden lever operation.
- 14. Crane operation is permissible up to a wind speed of 10m/s. Even in relatively light wind conditions, extra care should be taken when handling loads presenting large wind catching areas.
- 15. Kato bears no liability whatsoever for damage, crane tipping or other accident caused by crane operations which differ from the directions contained in the instruction manual and the warning labels.

When the outriggers are not used

- The lifting capacity charts are based on the jib stowed on the boom side.
- 2. The lifting capacity chart indicates the maximum load the crane can lift when its body is level on firm level ground with all tires inflated to the rated pressure and the suspension cylinder completely retracted. The values in the chart include the mass of the main hook and slings. Within the chart the figures in the area bordered with a thick line are based on structural limitations while other figures are determined by stability limitations.

[Rated tire pressure: 505 / 95 R25: 800kPa (8.0kgf/cm²), 23.5-25: 475kPa (4.75kgf/cm²)]

If you operate the crane without the suspension cylinders completely retracted, take special care that the crane does not incline and tip over

- The working radii are the actual values allowing for boom deflection. Therefore you must always operate the crane on the basis of the working radius.
- 4. The lifting capacity differs between the front area capacity and the full range capacity. When slewing from the front to the side, take care that the crane could not be over loaded.

Crane operation	Stationary crane-on-rubber operation	Pick and carry operation
Area α°	1	1

The lifting capacity of the rooster sheave is the lifting capacity of the boom minus the mass of all attached hook, slings etc. to the boom, with an upper limit of 5,000kg.

[The hook for use with the rooster sheave is the 5 ton hook (mass: 120kg) with one part of line.]

- 6. Do not work with the jib or with a boom length of more than 26.9m
- 7. For stationary crane-on-rubber operation, the parking brake and service brake lock device must be engaged.
- 8. For pick and carry operation, the super-slow speed switch must be switched to "ON" and the shift lever set to speed 1.
- For pick and carry operation, lower the load to just above the ground and keep your speed strictly below 2km/h to avoid swinging the load. Take particular care to avoid sharp turns, sudden starts and stops.
- Never operate the crane during pick and carry operation. The slewing brake must be applied.
- 11. If the boom length, boom angle and/or working radius exceeds the rated value, use the lifting capacity for the rated value or for the next one, whichever gives the smaller lifting capacity.
- 12. The standard parts of line for each boom length are as indicated in the chart. If you work with a non-standard number of parts of line, do not exceed 45.1 kN (4.6 tf) per wire rope respectively.
- 13. High-speed winch operation should only be performed to allow descent of the hook alone. Avoid sudden lever operation.
- 14. Crane operation is permissible up to a wind speed of 10m/s. Even in relatively light wind conditions, extra care should be taken when handling loads presenting large wind catching areas
- 15. Kato bears no liability whatsoever for damage, crane tipping or other accident caused by crane operations which differ from the directions contained in the instruction manual and the warning labels.

Notes:

- 1. This diagram does not include deflection of Boom and Jib.
- 2. The outriggers are fully extended.

■Minimum path width

●Left turn in two-wheel steering mode

- R₁=11.70m (Minimum turning radius)
- R₂=12.00m (Turning radius of extremely outer tire)
- R₃=12.80m (Chassis turning radius)
- R₄=15.20m (Boom end turning radius)
- R₅=8.40m (Turning radius extremely chassis
- A=5.79m (Width of entrance)
- B=5.79m (Width of wheel exit)
- C=6.59m (Width of chassis exit)
- D=9.07m (Width of exit at end of boom)

●Left turn in 4-wheel steering mode

- R₁=6.70m (Minimum turning radius)
- R₂=7.00m (Turning radius of extremely outer tire)
- R₃=7.80m (Chassis turning radius)

• R₄=10.70m (Boom end turning radius)

- R₅=3.80m
- (Turning radius extremely chassis inner)
- R6=8.00m (Turning radius at the rear end of the chassis)
- A₀=5.20m (Width of chassis entrance)
- A₁=4.00m (Width of wheel entrance)
- B =4.00m (Width of wheel exit)
- C =5.20m (Width of chassis exit)
- D =8.10m (Width of exit at end of boom)

Note: The above values are based on calculations.
